REGARDING ANSWER KEY FOR ICMR-JRF EXAM. HELD ON 08.07.2023

Dated: 18.7.2023

NOTICE - (ICMR-JRF-2023)

This is for the information of all the candidates appeared in **ICMR-JRF-2023** Computer based examination (CBT) conducted by the PGIMER, Chandigarh on 8.7.2023 at various centres across the country. **QUESTION PAPER AND ANSWER KEY** is uploaded on the website for the information of the applicants. If a candidate finds any discrepancies/doubts regarding the answer key of the question paper, he/she may communicate the same to Administrative Officer, Academic Section, PGIMER, Chandigarh, via e-mail i.e. chandra.ganesh@pgimer.edu.in in the following format:

Roll No.	Name, address, e.mail, Mobile No. of the Candidate	Stream	Question Number & section	Question issue and description.

Please note that for raising objections/doubts a fee of Rs.500/- per question is payable, if the objection/doubt is found valid/justified then the fee (@Rs.500/- per valid objection/question) will be refunded. If objection/doubt found invalid the fee will be forfeited.

The objections/doubts can be sent/submitted till 22nd July 2023 up to 11:59 P.M. No objection/doubt raised beyond this time limit will be entertained.

Fee may be paid through online/RTGS in the account details as under:-

Account name : Director, PGI Private Grant Account
Account Number : 1041-3583830
IFSC Code : SBIN0001524
Bank Name : State Bank of India, Medical Institute (MI)
Branch Sector-12, Chandigarh

A proof of payment of fee i.e. screenshot of successful transaction/RTGS number must be enclosed with the objection, failing objection will not be considered. Objections/doubts received within above prescribed period will be placed before the committee of the experts for their consideration. If these objections/doubts found valid then the decision/ remedial action will be uploaded on the official websites of both the Institutes i.e. pgimer.edu.in & icmr.nic.in for the information to all concerned. No separate communication will be issued to individual. Decision of the Committee of experts will be final in this regard.

Question Label : MCQ

We know that we are made of particles. But when the universe began, no particles had mass; they all sped around at the speed of light. It is believed that stars, planets and life could only emerge because particles gained their mass from a fundamental mass-giving field. The existence of this field was confirmed with the discovery of:

Options :

1. ✗ Neutrino
2. ✗ Graviton
3. ✓ Higgs boson particle
4. ✗ Magnetic photon

Question Number : 40 Question Id : 98606863449 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks : 1 Wrong Marks : 0.25

Question Label : MCQ

There is a legend that the when the inventor of chess showed it to the ruler, the latter was so pleased that he asked the inventor to ask for any prize. The inventor is supposed to have asked that he may be given one grain for the first square, two for the second, four for the third, and so on; doubling the number of grains for each subsequent square. According to the legend, the ruler laughed at it saying it is such a small prize. But when the treasurers started to calculate, they found that this would require such huge number of wheat grains which they do not have. This legend illustrates:

Options :

1. ✘ The vast number of possibilities in chess
2. ✘ Ignorance of the inventor
3. ✘ The inability of humans to learn the game
4. ✔ How quickly exponential sequences grow

One study intended to compare 12-hour nursing shifts to 8-hour shifts to assess the effects on patient outcomes in the different wards of a hospital. The most suitable design would be:

Options :

1. ✗ Retrospective case-control (trohoc) study
2. ✓ Cluster randomized trial
3. ✗ Cohort study
4. ✗ Cross-sectional study

Question Number : 46 Question Id : 98606863455 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks : 1 Wrong Marks : 0.25

Question Label : MCQ

Modification of behaviour by study participants in response to their knowledge that they are being observed is known as:

Options :

1. ✗ Placebo effect
2. ✗ Neyman's bias
3. ✗ Berkson's bias

4. ✓ Hawthorne effect

Question Number : 47 Question Id : 98606863456 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks : 1 Wrong Marks : 0.25

Question Label : MCQ

In a study, 5000 patients are randomly divided into two groups, one is administered 100 mg of a drug, the other gets placebo. The study endpoint is comparison of the incidence of stroke among the two groups at the end of 5 years. The statistical test most appropriate would be:

Options :

1. ✓ Chi-square test
2. ✗ Mann-Whitney U test
3. ✗ Unpaired t-test
4. ✗ Wilcoxon signed-rank test

Question Number : 48 Question Id : 98606863457 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks : 1 Wrong Marks : 0.25

Question Label : MCQ

Which of following guidelines should be followed while reporting the results from a randomized clinical trial?

Options :

1. ✓ CONSORT
2. ✗ PRISMA
3. ✗ STARD
4. ✗ STROBE

Question Number : 49 Question Id : 98606863458 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks : 1 Wrong Marks : 0.25

Question Label : MCQ

Which of the following example represents nominal data in statistics?

Options :

1. ✓ Colours of a rainbow
2. ✗ Blood pressure recordings
3. ✗ Age
4. ✗ Degree of pain graded as mild, moderate, and severe

Question Number : 50 Question Id : 98606863459 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks : 1 Wrong Marks : 0.25

Question Label : MCQ

The players of a football team (excluding substitutes) were advised to stand as per the ascending order of their height. The median height of the football team would be?

Options :

1. ✓ That of the 6th person
2. ✗ The sum of the height of the fifth and sixth player
3. ✗ Average of the height of the fifth and sixth player
4. ✗ Average of the height of the fifth, sixth and the seventh player

Question Label : MCQ

All of the following are RNA viruses, EXCEPT:

Options :

1. ✔ Hepatitis B virus
2. ✘ Hepatitis A virus
3. ✘ Hepatitis C virus
4. ✘ Hepatitis E virus

Question Number : 54 Question Id : 98606863463 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks : 1 Wrong Marks : 0.25

Question Label : MCQ

Cetrimide agar is used as selective medium for:

Options :

1. ✘ *Klebsiella*
2. ✔ *Pseudomonas*
3. ✘ *Shigella*
4. ✘ *Salmonella*

Question Number : 55 Question Id : 98606863464 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks : 1 Wrong Marks : 0.25

Question Label : MCQ

Enterobius vermicularis is commonly known as:

Options :

1. ✔ Pinworm
2. ✘ Roundworm
3. ✘ Whipworm
4. ✘ Hookworm

Question Number : 56 Question Id : 98606863465 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks : 1 Wrong Marks : 0.25

Question Label : MCQ

An organism whose genome has been altered by the introduction of one or more foreign DNA sequences from another species by artificial means is known as:

Options :

1. ✓ Transgenic
2. ✗ Humanized
3. ✗ Monoclonal
4. ✗ Inbred

Question Number : 57 Question Id : 98606863466 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks : 1 Wrong Marks : 0.25

Question Label : MCQ

Excretion of drugs in the urine involves three distinct processes: glomerular filtration, active tubular secretion, and:

Options :

1. ✗ Passive tubular secretion
2. ✗ Active tubular reabsorption
3. ✗ Enterohepatic circulation
4. ✓ Passive tubular reabsorption

Question Number : 58 Question Id : 98606863467 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks : 1 Wrong Marks : 0.25

Question Label : MCQ

Pharmacological agents targeting dopamine receptors are used in the treatment of which of the following?

Options :

1. ✗ Alzheimer's disease
2. ✗ Haemorrhagic stroke
3. ✗ Meningo-encephalitis
4. ✓ Schizophrenia

Question Number : 59 Question Id : 98606863468 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks : 1 Wrong Marks : 0.25

Question Label : MCQ

If a hypertensive patient complains of pedal oedema, he could likely be on:

Options :

1. ✗ Enalapril
2. ✓ Amlodipine

3. ✘ Metoprolol
4. ✘ Hydrochlorothiazide

Question Number : 60 Question Id : 98606863469 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks : 1 Wrong Marks : 0.25

Question Label : MCQ

Which of the following is an antimalarial drug?

Options :

1. ✘ Adenosine
2. ✘ Amiodarone
3. ✔ Artemisinin
4. ✘ Amitriptyline

Question Number : 61 Question Id : 98606863470 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks : 1 Wrong Marks : 0.25

Question Label : MCQ

For converting mg/ml into molar units for a drug, you need to know:

Options :

1. ✘ Valency
2. ✘ Solubility
3. ✘ Molecular size
4. ✔ Gram molecular weight

Question Number : 62 Question Id : 98606863471 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks : 1 Wrong Marks : 0.25

Question Label : MCQ

Which lobe of the brain is responsible for receiving and interpreting visual information?

Options :

1. ✘ Frontal lobe
2. ✘ Parietal lobe
3. ✘ Temporal lobe
4. ✔ Occipital lobe

Question Number : 63 Question Id : 98606863472 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks : 1 Wrong Marks : 0.25

Question Label : MCQ

Glycated haemoglobin (HbA1C) reflects average plasma glucose over the previous:

Options :

1. ✘ 4-6 weeks
2. ✔ 8-12 weeks
3. ✘ 20-24 weeks
4. ✘ 2-4 weeks

Question Number : 64 Question Id : 98606863473 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks : 1 Wrong Marks : 0.25

Question Label : MCQ

The hormone erythropoietin stimulates red blood cell production in the red bone marrow. Where in the body is erythropoietin produced?

Options :

1. ✘ Spleen
2. ✔ Kidney
3. ✘ Liver
4. ✘ Thyroid

Question Number : 65 Question Id : 98606863474 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks : 1 Wrong Marks : 0.25

Question Label : MCQ

Which of the following blood vessels offer the greatest resistance to blood flow through the arterial system?

Options :

1. ✘ Arteries
2. ✔ Arterioles
3. ✘ Capillaries
4. ✘ Veins

Question Number : 66 Question Id : 98606863475 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks : 1 Wrong Marks : 0.25

Question Label : MCQ

If the genetic code consisted of four bases per codon instead of three bases per codon, then what will be the possible number of codons that code for 20 types of amino acids (Given the stop codons are same)?

Options :

1. ✘ 64
2. ✔ 253
3. ✘ 61
4. ✘ 256

Question Number : 67 Question Id : 98606863476 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks : 1 Wrong Marks : 0.25

Question Label : MCQ

Acid guanidinium thiocyanate-phenol-chloroform extraction (AGPC) is an extraction method is used for isolation of:

Options :

1. ✘ RNA only
2. ✔ RNA, DNA as well as proteins
3. ✘ Proteins only
4. ✘ DNA only

Question Number : 68 Question Id : 98606863477 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks : 1 Wrong Marks : 0.25

Question Label : MCQ

RPMI 1640 growth medium used for cell culture contains all of the following, EXCEPT:

Options :

1. ✔ Growth Factors
2. ✘ Salts
3. ✘ Glucose
4. ✘ Vitamins

Question Number : 69 Question Id : 98606863478 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks : 1 Wrong Marks : 0.25

Question Label : MCQ

Which of the following is the most probable explanation for higher lability of RNA than DNA?

Options :

1. ✘ Presence of metal ions like Mg^{2+} in its secondary and tertiary structure
2. ✘ Single stranded nature of RNA in contrast to double strand in DNA
3. ✔ Hydroxyl groups in the ribose backbone lowering activation energy of hydrolysis
4. ✘ Collections of short helices packed together into its structure

Question Number : 70 Question Id : 98606863479 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks : 1 Wrong Marks : 0.25

Question Label : MCQ

Which of the following is NOT a feature of flow cytometry?

Options :

1. ✘ Sample should be in monodisperse suspension
2. ✔ The Core stream consists of sheath fluid only
3. ✘ Pressure of the stream presents cells in a single file to the laser beam
4. ✘ Cells scatter the light and are excited by beam and emit fluorescent light

Question Number : 71 Question Id : 98606863480 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks : 1 Wrong Marks : 0.25

Question Label : MCQ

Statement I: Aspirin and paracetamol belong to the class of non-narcotic analgesics.

Statement II: Aspirin inhibits the synthesis of chemicals known as prostaglandins which stimulate inflammation in the tissue and cause pain.

Options :

1. ✔ Statement I and Statement II both are correct
2. ✘ Statement I and Statement II both are incorrect
3. ✘ Statement I is correct but Statement II is incorrect
4. ✘ Statement I is incorrect but Statement II is correct

Question Number : 72 Question Id : 98606863481 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks : 1 Wrong Marks : 0.25

Question Label : MCQ

HbS (Sickle Cell Anaemia) is a result of:

Options :

1. ✔ Transversion mutation
2. ✘ Transition mutation
3. ✘ Non-sensitive mutation
4. ✘ Frameshift mutation

Question Number : 73 Question Id : 98606863482 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks : 1 Wrong Marks : 0.25

Question Label : MCQ

RNA interference (RNAi) or Post-Transcriptional Gene Silencing (PTGS) is a conserved biological response to:

Options :

1. ✔ double-stranded RNA
2. ✘ DNA- RNA hybrid
3. ✘ Methylated double stranded DNA
4. ✘ Single stranded DNA

Question Number : 74 Question Id : 98606863483 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks : 1 Wrong Marks : 0.25

Question Label : MCQ

Databases such as CATH and SCOP are used to identify:

Options :

1. ✓ the structural family to which a protein belongs
2. ✗ the genetic family to which a protein belongs
3. ✗ homologous proteins
4. ✗ analogous proteins

Question Number : 75 Question Id : 98606863484 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks : 1 Wrong Marks : 0.25

Question Label : MCQ

What is the function of Chaperonins?

Options :

1. ✗ Conformation prediction
2. ✓ Protein folding
3. ✗ Complex & slow conformation stability
4. ✗ Stability analysis

Question Number : 76 Question Id : 98606863485 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks : 1 Wrong Marks : 0.25

Question Label : MCQ

A population of insects exists in which black coloration is dominant to white. If there are 64 black insects and 36 white insects in the population, what is the recessive allele frequency?

Options :

1. ✗ 0.16
2. ✗ 0.4
3. ✓ 0.6
4. ✗ 0.36

Question Number : 77 Question Id : 98606863486 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks : 1 Wrong Marks : 0.25

Question Label : MCQ

Which of the following choices are likely to change the allele frequencies of the indicated populations?

I. A geographic barrier isolating a small subset of a larger population

- II. The introduction of a predator that only preys upon the homozygous dominant members of the population
- III. A population that displays completely random mating

Options :

- 1. ✘ III only
- 2. ✘ I, II and III
- 3. ✘ II only
- 4. ✔ I and II

Question Number : 78 Question Id : 98606863487 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks : 1 Wrong Marks : 0.25

Question Label : MCQ

Which of the following are examples of codominance?

- I. A person with blood type AB
- II. A flower that displays a red and white spotted phenotype (both colours are attributed to the same gene; homozygosity for either colour makes a flower that is completely red or white)
- III. A flower that displays a pink phenotype (a homozygous dominant flower is red and a homozygous recessive flower is white)
- IV. An organism whose heterozygous phenotype is identical to the homozygous dominant phenotype

Options :

- 1. ✘ III and IV
- 2. ✘ IV only
- 3. ✔ I and II
- 4. ✘ I, II and III

Question Number : 79 Question Id : 98606863488 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks : 1 Wrong Marks : 0.25

Question Label : MCQ

Crossing foxes that are double heterozygotes for two genes regulating coat colour yields 27 grey, 12 red and 9 black offspring. What mechanism explains the ratio of coat colour observed in the offspring?

Options :

- 1. ✘ Mendelian inheritance
- 2. ✔ Epistasis
- 3. ✘ Pleiotropy
- 4. ✘ Chromosomal linkage

Question Number : 80 Question Id : 98606863489 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks : 1 Wrong Marks : 0.25

Question Label : MCQ

What is Orthology in the context of genome comparisons?

Options :

1. ✘ A homologous DNA sequence that was derived from a gene duplication event
2. ✔ A homologous DNA sequence that was derived from the same ancestral sequence
3. ✘ A gene that has the same DNA sequence as that in another species
4. ✘ A gene that has the same function as another gene sequence

Question Number : 81 Question Id : 98606863490 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks : 1 Wrong Marks : 0.25

Question Label : MCQ

Mutation in CFTR gene in cystic fibrosis results in the loss of _____ amino acid at the 508th position on protein.

Options :

1. ✘ Histidine
2. ✘ Tryptophan
3. ✘ Tyrosine
4. ✔ Phenylalanine

Question Number : 82 Question Id : 98606863491 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks : 1 Wrong Marks : 0.25

Question Label : MCQ

Balbani rings occur in:

Options :

1. ✘ Lampbrush chromosomes
2. ✘ Polysomes
3. ✔ Polytene chromosomes
4. ✘ Sex chromosomes

Question Number : 83 Question Id : 98606863492 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks : 1 Wrong Marks : 0.25

Question Label : MCQ

A human male can ejaculate as many as 500 million spermatozoa at one time. So, how many spermatocytes would be involved in producing this number of spermatozoa?

Options :

1. ✘ 500 million
2. ✔ 125 million
3. ✘ 150 million
4. ✘ 200 million

Question Number : 84 Question Id : 98606863493 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks : 1 Wrong Marks : 0.25

Question Label : MCQ

A recessive mutation was discovered in a small island population (1,000 individuals). The mutation was observed in the heterozygous state but never in the homozygous state. What is the possible explanation for this observation?

Options :

1. ✘ Only individuals with opposite alleles at this locus are reproduced
2. ✘ Heterozygous state is fixed in this population
3. ✔ Recessive allele is lethal in homozygous state
4. ✘ Population size is too small to give an explanation to this phenomenon

Question Number : 85 Question Id : 98606863494 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks : 1 Wrong Marks : 0.25

Question Label : MCQ

In humans, Down Syndrome is mainly caused due to three copies of chromosome 21. Assuming complete randomness of chromosome segregation, what would be the expected progeny from the mating between a normal male and a Down Syndrome female as the ratio of Down Syndrome and normal children?

Options :

1. ✔ Ratio 1 : 1
2. ✘ Ratio 1 : 2
3. ✘ Ratio 2 : 1
4. ✘ Ratio 3 : 1

Question Number : 86 Question Id : 98606863495 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks : 1 Wrong Marks : 0.25

Question Label : MCQ

In the arterial blood gas analysis, an increase in PaCO₂ will indicate the presence of:

Options :

1. ✔ Respiratory acidosis
2. ✘ Respiratory alkalosis
3. ✘ Metabolic acidosis
4. ✘ Metabolic alkalosis

Question Number : 87 Question Id : 98606863496 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks : 1 Wrong Marks : 0.25

Question Label : MCQ

Which of the following structure is responsible for the formation of cerebrospinal fluid?

Options :

1. ✓ Choroid plexus
2. ✗ Arachnoid plexus
3. ✗ Arachnoid villus
4. ✗ Arachnoid mater

Question Number : 88 Question Id : 98606863497 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks : 1 Wrong Marks : 0.25

Question Label : MCQ

Extrinsic pathway in blood coagulation is triggered by the release of:

Options :

1. ✓ Tissue factor
2. ✗ Factor VII
3. ✗ Tissue plasminogen inhibitor
4. ✗ Factor X

Question Number : 89 Question Id : 98606863498 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks : 1 Wrong Marks : 0.25

Question Label : MCQ

In an organism, if the normal diploid number of chromosomes is 8, how many chromatids are present in each daughter cell at the end of meiosis I?

Options :

1. ✗ 2
2. ✗ 4
3. ✓ 8
4. ✗ 16

Question Number : 90 Question Id : 98606863499 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks : 1 Wrong Marks : 0.25

Question Label : MCQ

Which of the following chromosomes is NOT commonly involved in Robertsonian translocation?

Options :

1. ✓ 7
2. ✗ 13
3. ✗ 21
4. ✗ 22

Question Number : 91 Question Id : 98606863500 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks : 1 Wrong Marks : 0.25

Question Label : MCQ

Which cell component is stained by supravital staining in the reticulocytes?

Options :

1. ✘ DNA
2. ✘ Cell membrane
3. ✘ Mitochondria
4. ✔ Ribonucleoproteins

Question Number : 92 Question Id : 98606863501 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks : 1 Wrong Marks : 0.25

Question Label : MCQ

Which part of the compound microscope that helps in gathering and focusing light rays on the specimen to be viewed?

Options :

1. ✘ Objective lens
2. ✘ Magnifying lens
3. ✔ Condenser lens
4. ✘ Eyepiece lens

Question Number : 93 Question Id : 98606863502 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks : 1 Wrong Marks : 0.25

Question Label : MCQ

TAE buffer commonly used for DNA gel electrophoresis contains which of the following?

Options :

1. ✔ Tris, EDTA, Acetic Acid
2. ✘ Tris, EDTA, Alcohol
3. ✘ Tris, Ethanol, Acetic Acid
4. ✘ Tris, Alcohol, Ethanol

Question Number : 94 Question Id : 98606863503 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks : 1 Wrong Marks : 0.25

Question Label : MCQ

A piece of DNA was analyzed and 15% of its nucleotides were adenine. What percentage would be uracil?

Options :

1. ✓ 0 percent
2. ✗ 15 percent
3. ✗ 30 percent
4. ✗ 35 percent

Question Number : 95 Question Id : 98606863504 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks : 1 Wrong Marks : 0.25

Question Label : MCQ

Which of the following techniques would be the best to quantify the amount of protein in a sample?

Options :

1. ✗ Southern Blot
2. ✗ Quantitative PCR
3. ✗ Coimmunoprecipitation
4. ✓ Bradford Assay

Question Number : 96 Question Id : 98606863505 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks : 1 Wrong Marks : 0.25

Question Label : MCQ

Which of the following is a protein modification that can initiate the degradation of the modified protein?

Options :

1. ✓ Ubiquitination
2. ✗ Palmitoylation
3. ✗ Myristylation
4. ✗ Glycosylation

Question Number : 97 Question Id : 98606863506 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks : 1 Wrong Marks : 0.25

Question Label : MCQ

If a double strand break (DSB) is not repaired during G1 phase of the cell cycle, what type of replication error would result during S phase at the site of the DSB?

Options :

1. ✗ Gap in the newly replicated DNA strand
2. ✓ Collapsed replication fork
3. ✗ Catenane formations
4. ✗ Reversed replication fork

Question Number : 98 Question Id : 98606863507 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum

Instruction Time : 0

Correct Marks : 1 Wrong Marks : 0.25

Question Label : MCQ

What approximate percentage of total RNA content in a cell is messenger RNA (mRNA)?

Options :

1. ✘ 25-30 percent
2. ✔ 2-5 percent
3. ✘ 80-85 percent
4. ✘ 45-50 percent

Question Number : 99 Question Id : 98606863508 Question Type : MCQ Option Shuffling : Yes Is

Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum

Instruction Time : 0

Correct Marks : 1 Wrong Marks : 0.25

Question Label : MCQ

A scientist has been working with a new species of plant. He has found that there are two separate genes, which segregate according to standard Mendelian genetics, that are capable of producing the same phenotype. A single dominant allele from either gene confers red coloration of the plant's flowers. Without any dominant alleles the flowers are white. If he crosses two plants heterozygous for both traits, what will be the resulting phenotypic ratios of the offspring?

Options :

1. ✔ 15 red:1 white
2. ✘ 9 red:6 pink:1 white
3. ✘ 3 red:1 white
4. ✘ 16 red:0 white

Question Number : 100 Question Id : 98606863509 Question Type : MCQ Option Shuffling : Yes Is

Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum

Instruction Time : 0

Correct Marks : 1 Wrong Marks : 0.25

Question Label : MCQ

In spectral karyotyping (SKY), how many sets of FISH probes are utilized?

Options :

1. ✘ 28
2. ✘ 26
3. ✘ 22
4. ✔ 24

Question Number : 101 Question Id : 98606863510 Question Type : MCQ Option Shuffling : Yes Is

Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum

Instruction Time : 0

Correct Marks : 1 Wrong Marks : 0.25

Question Label : MCQ

How many genes are present in human mitochondrial genome?

Options :

1. ✘ 24
2. ✔ 37
3. ✘ 32
4. ✘ 64

Question Number : 102 Question Id : 98606863511 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks : 1 Wrong Marks : 0.25

Question Label : MCQ

Estimation of gamma-glutamyl transferase is useful to detect which one of the following clinical conditions?

Options :

1. ✘ Infective hepatitis
2. ✔ Alcohol abuse
3. ✘ Kidney failure
4. ✘ Myocardial infection

Question Number : 103 Question Id : 98606863512 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks : 1 Wrong Marks : 0.25

Question Label : MCQ

Which of the following amino acids is present at every third position in collagen molecule?

Options :

1. ✘ Hydroxyproline
2. ✘ Lysine
3. ✘ Proline
4. ✔ Glycine

Question Number : 104 Question Id : 98606863513 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks : 1 Wrong Marks : 0.25

Question Label : MCQ

Which component of proteins absorb UV light at 280 nm?

Options :

1. ✘ Peptide bonds
2. ✘ SH group of cysteine
3. ✘ Imidazole group of tryptophan
4. ✔ Indole group of tryptophan

Question Number : 105 Question Id : 98606863514 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks : 1 Wrong Marks : 0.25

Question Label : MCQ

Which of the following enzyme participates in both the citric acid cycle and the electron transport chain?

Options :

1. ✘ NADH dehydrogenase
2. ✘ Malate dehydrogenase
3. ✔ Succinate dehydrogenase
4. ✘ Isocitrate dehydrogenase

Question Number : 106 Question Id : 98606863515 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks : 1 Wrong Marks : 0.25

Question Label : MCQ

Each turn of an α -helix in secondary structure of protein contains:

Options :

1. ✔ 3.6 amino acids
2. ✘ 3.4 amino acids
3. ✘ 3.2 amino acids
4. ✘ 3.0 amino acids

Question Number : 107 Question Id : 98606863516 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks : 1 Wrong Marks : 0.25

Question Label : MCQ

Nucleotide bases and aromatic amino acids absorb light respectively at:

Options :

1. ✔ 260 and 280 nm
2. ✘ 280 and 260 nm
3. ✘ both at 280 nm
4. ✘ 260 and 270 nm

Question Number : 108 Question Id : 98606863517 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0

Question Label : MCQ

A 62-year-old man is admitted with emphysema and acute upper respiratory infection. Oxygen is ordered at 2 L/min. The reason for low-flow oxygen is to:

Options :

1. ✘ Facilitate oxygen diffusion of the blood.
2. ✘ Prevent excessive drying of secretions
3. ✔ Prevent depression of the respiratory drive

4. ✘ **Compensate for increased airway resistance**

Question Number : 109 Question Id : 98606863518 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks : 1 Wrong Marks : 0.25

Question Label : MCQ

The physician has ordered mannitol IV for a patient with head injury. What should be closely monitored because the patient is receiving mannitol?

Options :

1. ✔ **Urine output**
2. ✘ **Deep tendon reflexes**
3. ✘ **Pulse rate**
4. ✘ **Level of orientation**

Question Number : 110 Question Id : 98606863519 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0

Question Label : MCQ

The serum potassium level of a patient is 2.5 mEq/L (2.5 mmol/L). Which of the following will NOT be seen on the electrocardiogram (ECG)?

Options :

1. ✘ **U waves**
2. ✔ **Tall T waves**
3. ✘ **Depressed ST segment**
4. ✘ **Widened QRS complex**

Question Number : 111 Question Id : 98606863520 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks : 1 Wrong Marks : 0.25

Question Label : MCQ

Which of the following is a potassium sparing diuretic?

Options :

1. ✘ **Mannitol**
2. ✔ **Spironolactone**
3. ✘ **Furosemide**
4. ✘ **Acetazolamide**

Question Number : 112 Question Id : 98606863521 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks : 1 Wrong Marks : 0.25

Question Label : MCQ

Which part of the body best represents the core body temperature?

Options :

1. ✘ Oral cavity
2. ✘ Axilla
3. ✘ Nasal cavity
4. ✔ Rectum

Question Number : 113 Question Id : 98606863522 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks : 1 Wrong Marks : 0.25

Question Label : MCQ

Assume that there are 6 types of nitrogen bases available and 40 types of amino acids are available for protein synthesis, then in genetic code each codon made up by minimum how many nitrogen bases?

Options :

1. ✔ 3
2. ✘ 4
3. ✘ 5
4. ✘ 2

Question Number : 114 Question Id : 98606863523 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks : 1 Wrong Marks : 0.25

Question Label : MCQ

The cylindrical channels in gap junctions are made of:

Options :

1. ✔ Connexin
2. ✘ Collagen
3. ✘ Fibronectin
4. ✘ N-CAM

Question Number : 115 Question Id : 98606863524 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks : 1 Wrong Marks : 0.25

Question Label : MCQ

Which of the following is NOT used as a vector in Molecular cloning?

Options :

1. ✘ Plasmid
2. ✘ Cosmid
3. ✘ Artificial Chromosome
4. ✔ Hapten

Question Number : 116 Question Id : 98606863525 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks : 1 Wrong Marks : 0.25

Question Label : MCQ

The major donor of carbon atoms of the one-carbon pool is:

Options :

1. ✓ Serine
2. ✗ Tyrosine
3. ✗ Threonine
4. ✗ Proline

Question Number : 117 Question Id : 98606863526 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks : 1 Wrong Marks : 0.25

Question Label : MCQ

The computational methodology that tries to find the best matching between two molecules, a receptor and ligand is called:

Options :

1. ✗ Molecular matching
2. ✓ Molecular docking
3. ✗ Molecular fitting
4. ✗ Molecule affinity checking

Question Number : 118 Question Id : 98606863527 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks : 1 Wrong Marks : 0.25

Question Label : MCQ

A sample of DNA is found to have the base composition (mole ratio) of A = 40, T = 22, G = 21 and C = 17. This suggests:

Options :

1. ✗ DNA is circular duplex
2. ✗ DNA is linear duplex
3. ✓ DNA is single-stranded
4. ✗ DNA has high melting point

Question Number : 119 Question Id : 98606863528 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks : 1 Wrong Marks : 0.25

Question Label : MCQ

In eukaryotic cell transcription, RNA splicing and RNA capping take place inside?

Options :

1. ✘ Ribosomes
2. ✔ Nucleus
3. ✘ Endoplasmic reticulum
4. ✘ Dictyosomes

Question Number : 120 Question Id : 98606863529 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks : 1 Wrong Marks : 0.25

Question Label : MCQ

A few chromosomes having a small fragment called the satellite, have:

Options :

1. ✘ Non-staining secondary constriction at random location
2. ✘ Staining secondary constriction at constant location
3. ✔ Non-staining secondary constriction at constant location
4. ✘ Staining secondary constriction at random location

Question Number : 121 Question Id : 98606863530 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks : 1 Wrong Marks : 0.25

Question Label : MCQ

Microtubule and microfilament are composed of which type of protein?

Options :

1. ✔ Tubulin and Actin, respectively
2. ✘ Tubulin and Flagellin, respectively
3. ✘ Actin and Tubulin, respectively
4. ✘ Tubulin and Dynein, respectively

Question Number : 122 Question Id : 98606863531 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks : 1 Wrong Marks : 0.25

Question Label : MCQ

When an alkali metal is dissolved in NH_3 , it forms a blue coloured solution. The colour is due to:

Options :

1. ✘ Ammonia
2. ✔ Ammoniated electron
3. ✘ Ammoniated ion
4. ✘ Metal

Correct Marks : 1 Wrong Marks : 0.25

Question Label : MCQ

CD40L, an early activation marker is predominantly expressed on which of the following lymphocyte subset?

Options :

1. ✓ Helper T lymphocyte
2. ✗ B lymphocyte
3. ✗ Natural killer (NK) cells
4. ✗ Cytotoxic T lymphocyte

Question Number : 124 Question Id : 98606863533 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks : 1 Wrong Marks : 0.25

Question Label : MCQ

Natural killer (NK) cells recognize target cells for a cytotoxic response by which of the following mechanisms?

Options :

1. ✗ Absence of major histocompatibility complex (MHC) Class II molecules
2. ✓ Absence of major histocompatibility complex (MHC) Class I molecules
3. ✗ Presence of major histocompatibility complex (MHC) Class II molecules
4. ✗ Absence of CD16 molecules

Question Number : 1 Question Id : 98606863560 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks : 1 Wrong Marks : 0.25

Question Label : MCQ

A beaker is filled to the brim with water at 4°C. This water will overflow if its temperature is:

Options :

1. ✘ Increased
2. ✘ Reduced
3. ✔ Either increased or reduced
4. ✘ None of these options is correct

Question Number : 2 Question Id : 98606863561 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks : 1 Wrong Marks : 0.25

Question Label : MCQ

Mangoes can be ripened quickly by using:

Options :

1. ✔ Calcium carbide
2. ✘ Calcium carbonate
3. ✘ Calcium chloride

4. ✘ Calcium sulphide

Question Number : 3 Question Id : 98606863562 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks : 1 Wrong Marks : 0.25

Question Label : MCQ

Which colour of insulation covering is there on the earth wire that goes from the main switchboard to our rooms?

Options :

1. ✘ Red
2. ✘ Black
3. ✔ Green
4. ✘ Yellow

Question Number : 4 Question Id : 98606863563 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks : 1 Wrong Marks : 0.25

Question Label : MCQ

A relationship between two biological organisms, where one organism benefits while the other remains unaffected, is termed:

Options :

1. ✘ Predation
2. ✔ Commensalism
3. ✘ Mutualism
4. ✘ Parasitism

Question Number : 5 Question Id : 98606863564 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks : 1 Wrong Marks : 0.25

Question Label : MCQ

Ethanol as a viable bio-fuel can be obtained from:

Options :

1. ✘ Potato
2. ✘ Rice
3. ✔ Sugarcane
4. ✘ Wheat

Question Number : 6 Question Id : 98606863565 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks : 1 Wrong Marks : 0.25

Question Label : MCQ

Activated charcoal can be used to remove colouring matter from pure substances by:

Options :

1. ✓ Adsorption
2. ✗ Bleaching
3. ✗ Oxidation
4. ✗ Reduction

Question Number : 7 Question Id : 98606863566 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks : 1 Wrong Marks : 0.25

Question Label : MCQ

Which of the following is correct regarding the explanation of blue colour of the sky?

Options :

1. ✓ The blue light is more scattered by the air molecules in earth atmosphere giving it a blue appearance
2. ✗ The red light is more scattered by the atmospheric air molecules and becomes invisible, leaving only the blue light reach the observer
3. ✗ Dr. CV Raman was awarded the Nobel prize for describing this phenomenon
4. ✗ The blue colour of the sky is due to the reflection of light from the oceans and seas

Question Number : 8 Question Id : 98606863567 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks : 1 Wrong Marks : 0.25

Question Label : MCQ

Which of the following metals is an important constituent of the water purification agent zeolite?

Options :

1. ✓ Aluminium
2. ✗ Gold
3. ✗ Silver
4. ✗ Copper

Question Number : 9 Question Id : 98606863568 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks : 1 Wrong Marks : 0.25

Question Label : MCQ

Which of the muscles in our body has a name that relates it to tailoring?

Options :

1. ✗ Peroneus
2. ✗ Hamstrings
3. ✗ Trapezius
4. ✓ Sartorius

Question Number : 10 Question Id : 98606863569 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks : 1 Wrong Marks : 0.25

Question Label : MCQ

What colour is the best to wear to stay cool on a hot and sunny day?

Options :

1. ✘ Black
2. ✘ Blue
3. ✘ Orange
4. ✔ White

Question Number : 11 Question Id : 98606863570 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks : 1 Wrong Marks : 0.25

Question Label : MCQ

A herpetologist would be studying which of the following?

Options :

1. ✘ Butterfly
2. ✔ Snake
3. ✘ Blood
4. ✘ Liver

Question Number : 12 Question Id : 98606863571 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks : 1 Wrong Marks : 0.25

Question Label : MCQ

Which of the following metals is commonly used to increase the strength of steel alloys?

Options :

1. ✘ Bismuth
2. ✘ Boron
3. ✔ Molybdenum
4. ✘ Tin

Question Number : 13 Question Id : 98606863572 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks : 1 Wrong Marks : 0.25

Question Label : MCQ

Leather is prepared from which portion(s) of the skin?

Options :

1. ✘ Dermis alone

2. ✘ Both dermis and epidermis
3. ✔ Dermis and subcutaneous fatty tissue
4. ✘ Subcutaneous fatty tissue and underlying muscle

Question Number : 14 Question Id : 98606863573 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks : 1 Wrong Marks : 0.25

Question Label : MCQ

Humans have the ability to detect and discriminate at least 10,000 different odorants because we have one of the most evolved ____ system.

Options :

1. ✘ Auditory
2. ✘ Gustatory
3. ✔ Olfactory
4. ✘ Tactile

Question Number : 15 Question Id : 98606863574 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks : 1 Wrong Marks : 0.25

Question Label : MCQ

The pH of gastric acid (HCl) in the human stomach lumen can be as low as 1.5. Still, normally, it does not corrode the gastric mucosa because:

Options :

1. ✘ This pH is non-corrosive for the cells of the stomach
2. ✔ Mucosa secretes protective mucus that lines the surface
3. ✘ Humans take acid-lowering medications all the time to keep pH high
4. ✘ Gastric secretions contain milder acids as well which neutralize the strong acid (HCl)

Question Number : 16 Question Id : 98606863575 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks : 1 Wrong Marks : 0.25

Question Label : MCQ

A picture (year 1720) of personal protective equipment (PPE) is shown: To which epidemic was this related?

Options :

1. ✘ Influenza
2. ✘ Smallpox
3. ✘ Epidemic typhus
4. ✔ Plague

Question Number : 17 Question Id : 98606863576 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks : 1 Wrong Marks : 0.25

Question Label : MCQ

A key tool used for determining the age of prehistoric samples is:

Options :

1. ✘ Forensic calibration
2. ✘ Bone age determination
3. ✔ Radiocarbon dating
4. ✘ Todd's method

Question Number : 18 Question Id : 98606863577 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks : 1 Wrong Marks : 0.25

Question Label : MCQ

The Nobel Prize in Medicine is actually named as Nobel Prize in:

Options :

1. ✘ **Medicine or Surgery**
2. ✔ **Physiology or Medicine**
3. ✘ **Medicine or Pathology**
4. ✘ **Chemistry or Medicine**

Question Number : 19 Question Id : 98606863578 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks : 1 Wrong Marks : 0.25

Question Label : MCQ

Which of the following is an egg laying mammal?

Options :

1. ✘ **Racoon**
2. ✘ **European badger**
3. ✘ **Three-toed sloth**
4. ✔ **Duck billed platypus**

Question Number : 20 Question Id : 98606863579 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks : 1 Wrong Marks : 0.25

Question Label : MCQ

The full form of RT-PCR is:

Options :

1. ✘ **Reverse-time polymerase chain reaction**
2. ✔ **Reverse transcriptase polymerase chain reaction**
3. ✘ **Real-transcription polymerase chain reaction**
4. ✘ **Real-time polymerase chain reaction**

Question Number : 21 Question Id : 98606863580 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks : 1 Wrong Marks : 0.25

Question Label : MCQ

Which among the following radiofrequencies is most commonly used in global air navigational systems?

Options :

1. ✘ **Very Low Frequency (VLF)**
2. ✔ **Very High Frequency (VHF)**
3. ✘ **Tetra-Hertz Frequency (THF)**
4. ✘ **Ultra-High Frequency (UHF)**

Question Number : 22 Question Id : 98606863581 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks : 1 Wrong Marks : 0.25

Question Label : MCQ

Which part of the earth is suitable to witness the natural phenomena of dynamic light displays called 'aurora'?

Options :

1. ✓ Near the arctic and Antarctic
2. ✗ Closer to the equatorial regions
3. ✗ Sahara Desert
4. ✗ Mongolia

Question Number : 23 Question Id : 98606863582 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks : 1 Wrong Marks : 0.25

Question Label : MCQ

A mixture of oxygen with this gas reduces oxygen density and can be used in hospitals?

Options :

1. ✗ Nitrous oxide
2. ✗ Sevoflurane
3. ✗ Nitric oxide
4. ✓ Helium

Question Number : 24 Question Id : 98606863583 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks : 1 Wrong Marks : 0.25

Question Label : MCQ

Which of the following provided the major clue that led to the recognition of the double helical structure of DNA?

Options :

1. ✓ Xray crystallography images
2. ✗ Electron microscopy of dividing cells
3. ✗ Transmission electron microscopy of meiosis
4. ✗ Polarizing microscopy

Question Number : 25 Question Id : 98606863584 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks : 1 Wrong Marks : 0.25

Question Label : MCQ

Alfred Nobel, the founder of Nobel prizes was once called the 'merchant of death' for which of the following inventions?

Options :

1. ✘ Gun powder
2. ✘ Cyanide
3. ✔ Dynamite
4. ✘ Hydrogen bombs

Question Number : 26 Question Id : 98606863585 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks : 1 Wrong Marks : 0.25

Question Label : MCQ

Which of the following is the primary reason for the tremendous energy generated from the Sun and the other stars?

Options :

1. ✔ Nuclear fusion
2. ✘ Nuclear fission
3. ✘ Electromagnetic effect
4. ✘ Combustion of inert gases, especially helium

Question Number : 27 Question Id : 98606863586 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks : 1 Wrong Marks : 0.25

Question Label : MCQ

Which of the following is not a component of oral rehydration solution?

Options :

1. ✘ Sodium chloride
2. ✔ Sodium carbonate
3. ✘ Potassium chloride
4. ✘ Glucose

Question Number : 28 Question Id : 98606863587 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks : 1 Wrong Marks : 0.25

Question Label : MCQ

Most abundant organic polymer on earth is:

Options :

1. ✘ Collagen
2. ✘ Starch
3. ✔ Cellulose
4. ✘ Alginate

Question Number : 29 Question Id : 98606863588 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks : 1 Wrong Marks : 0.25

Question Label : MCQ

Which of the following salts is soluble in water at pH 7.0?

Options :

1. ✓ Copper sulphate
2. ✗ Barium Sulphate
3. ✗ Silver Chloride
4. ✗ Lead Sulphate

Question Number : 30 Question Id : 98606863589 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks : 1 Wrong Marks : 0.25

Question Label : MCQ

Which of the following microbe helps termites digest Cellulose?

Options :

1. ✗ *Fibrobacter succinogenes*
2. ✗ *Ruminococcus flavefaciens*
3. ✓ *Trichonympha campanula*
4. ✗ *Pseudomonas putida*

Question Number : 31 Question Id : 98606863590 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks : 1 Wrong Marks : 0.25

Question Label : MCQ

The Xanthophyte (Yellow Green Algae) cell walls are typically made up of:

Options :

1. ✗ Chitin
2. ✓ Cellulose and pectin
3. ✗ Starch
4. ✗ Xylan and chitin

Question Number : 32 Question Id : 98606863591 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks : 1 Wrong Marks : 0.25

Question Label : MCQ

Spectacles used for viewing 3D films have:

Options :

1. ✓ Polaroids

2. ✘ Concave lens
3. ✘ Convex lens
4. ✘ Bifocal lens

Question Number : 33 Question Id : 98606863592 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks : 1 Wrong Marks : 0.25

Question Label : MCQ

Acrylamide is a substance that forms through a natural chemical reaction between sugars and asparagine in plant-based foods during high-temperature cooking, such as frying, roasting, and baking. It is important to know about this chemical because:

Options :

1. ✔ High levels of acrylamide caused cancer in laboratory animals
2. ✘ Low levels of acrylamide caused cancer in humans in laboratory conditions
3. ✘ Low levels of acrylamide were shown to protect against cancer in both humans and animals
4. ✘ High levels of acrylamide were shown to protect against cancer in both humans and animals

Question Number : 34 Question Id : 98606863593 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks : 1 Wrong Marks : 0.25

Question Label : MCQ

A diverse mixture of sound waves extending over a wide frequency range or a constant background noise especially one that drowns out other sounds is called:

Options :

1. ✘ Pink noise
2. ✘ Brown noise
3. ✔ White noise
4. ✘ Physiological noise

Question Number : 35 Question Id : 98606863594 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks : 1 Wrong Marks : 0.25

Question Label : MCQ

It is well-known that plants can survive for short periods without light. This process of adaptation is termed:

Options :

1. ✘ Chlorophyll formation
2. ✘ Photosynthesis
3. ✔ Etiolation
4. ✘ Chlorosis

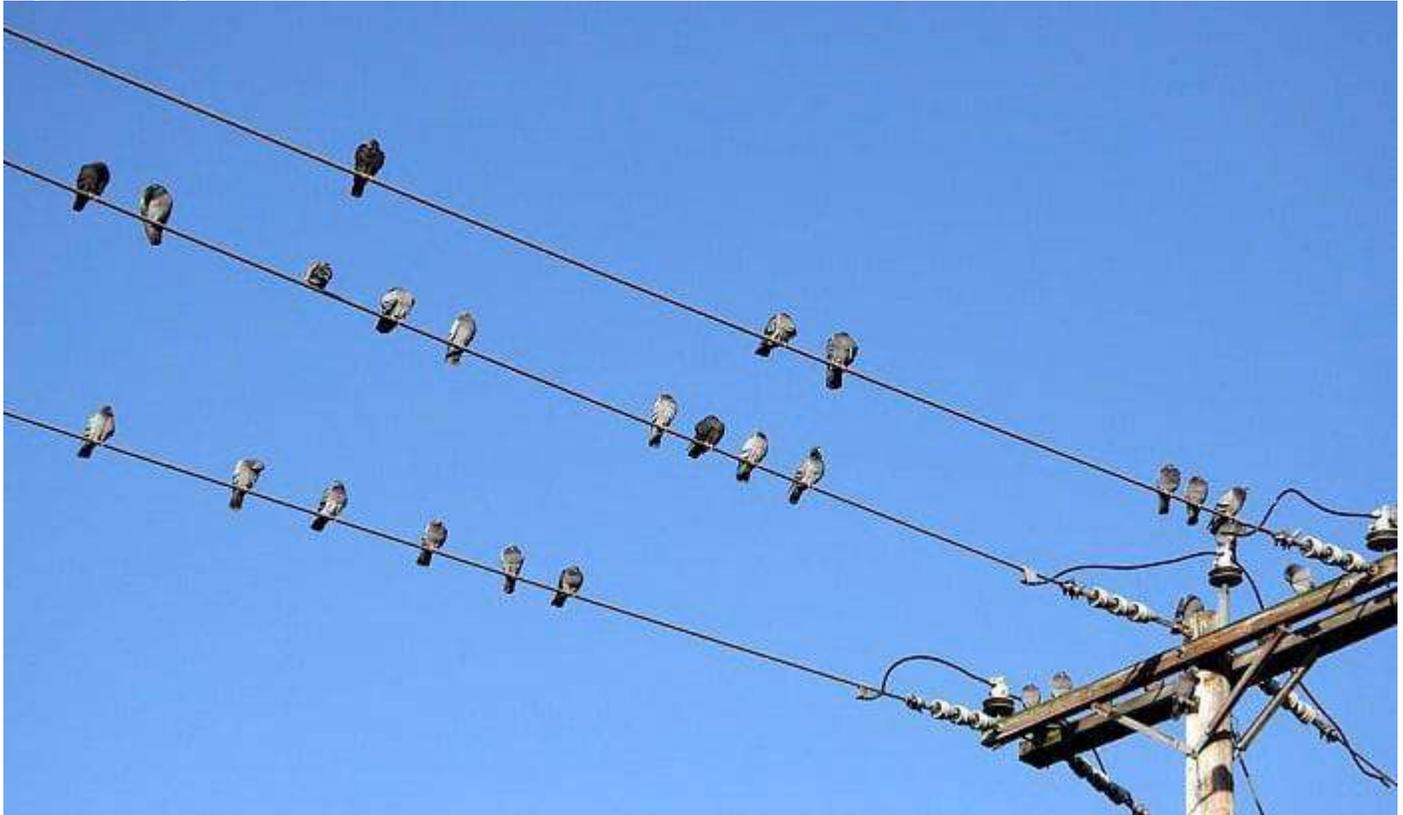

Question Number : 36 Question Id : 98606863595 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum

Instruction Time : 0

Correct Marks : 1 Wrong Marks : 0.25

Question Label : MCQ

Pigeons sitting on electric wires is a common site as shown below:

What is the reason that they do not get electrocuted even though these are high voltage wires?

Options :

1. ✘ Their feet are strong insulators of electricity
2. ✔ For electricity to flow voltage difference is needed
3. ✘ Pigeons are naturally resistant to electric current
4. ✘ The wires automatically stop conducting once a bird sits on them

Question Number : 37 Question Id : 98606863596 Question Type : MCQ Option Shuffling : Yes Is

Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum

Instruction Time : 0

Correct Marks : 1 Wrong Marks : 0.25

Question Label : MCQ

A student asks his science teacher whether he can catch fire if he runs very fast. The teacher replies that scientists have shown that one needs to run at speeds of about 6000 km/hour for this. What is the major reason for generation of heat if one runs at high speeds?

Options :

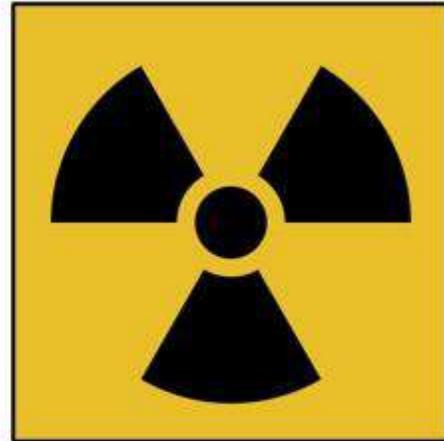

1. ✘ Friction of the body with the air
2. ✔ Compression of air molecules in front of the runner
3. ✘ Friction of the clothes with the air
4. ✘ Generation of heat by the runner's body

Question Number : 38 Question Id : 98606863597 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks : 1 Wrong Marks : 0.25

Question Label : MCQ

A caricature is shown below with three-headed dog and a symbol. This shows dangers of which of the following?

Options :

1. ✓ Radiation
2. ✗ Drugs of abuse
3. ✗ Global warming
4. ✗ War

Question Number : 39 Question Id : 98606863598 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks : 1 Wrong Marks : 0.25

Question Label : MCQ

We know that we are made of particles. But when the universe began, no particles had mass; they all sped around at the speed of light. It is believed that stars, planets and life could only emerge because particles gained their mass from a fundamental mass-giving field. The existence of this field was confirmed with the discovery of:

Options :

1. ✗ Neutrino
2. ✗ Graviton
3. ✓ Higgs boson particle
4. ✗ Magnetic photon

Question Number : 40 Question Id : 98606863599 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks : 1 Wrong Marks : 0.25

Question Label : MCQ

There is a legend that the when the inventor of chess showed it to the ruler, the latter was so pleased that he asked the inventor to ask for any prize. The inventor is supposed to have asked that he may be given one grain for the first square, two for the second, four for the third, and so on; doubling the number of grains for each subsequent square. According to the legend, the ruler laughed at it saying it is such a small prize. But when the treasurers started to calculate, they found that this would require such huge number of wheat grains which they do not have. This legend illustrates:

Options :

1. ✘ The vast number of possibilities in chess
2. ✘ Ignorance of the inventor
3. ✘ The inability of humans to learn the game
4. ✔ How quickly exponential sequences grow

Question Number : 41 Question Id : 98606863600 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks : 1 Wrong Marks : 0.25

Question Label : MCQ

If a child "x" is said to be having weight above 70th percentile. What does it mean?

Options :

1. ✔ 30% of the children are above the weight of "x"
2. ✘ 70% of the children are above the weight of "x"
3. ✘ 30% of the children are below the weight of "x"
4. ✘ 70% of the children have the same weight as "x"

Question Number : 42 Question Id : 98606863601 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks : 1 Wrong Marks : 0.25

Question Label : MCQ

The mean of 20 observations is 6.21. Later on, it was discovered that the two items +5 and +3 were taken as -5 and -3. Find the correct mean.

Options :

1. ✔ 7.01
2. ✘ 7.1
3. ✘ 6.01
4. ✘ 6.1

Question Number : 43 Question Id : 98606863602 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0

Question Label : MCQ

In a study, 5000 patients are randomly divided into two groups, one is administered 100 mg of a drug, the other gets placebo. The study endpoint is comparison of the incidence of stroke among the two groups at the end of 5 years. The statistical test most appropriate would be:

Options :

1. ✔ Chi-square test
2. ✘ Mann-Whitney U test
3. ✘ Unpaired t-test
4. ✘ Wilcoxon signed-rank test

Question Number : 48 Question Id : 98606863607 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks : 1 Wrong Marks : 0.25

Question Label : MCQ

Which of following guidelines should be followed while reporting the results from a randomized clinical trial?

Options :

1. ✔ CONSORT
2. ✘ PRISMA
3. ✘ STARD
4. ✘ STROBE

Question Number : 49 Question Id : 98606863608 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks : 1 Wrong Marks : 0.25

Question Label : MCQ

Which of the following example represents nominal data in statistics?

Options :

1. ✔ Colours of a rainbow
2. ✘ Blood pressure recordings
3. ✘ Age
4. ✘ Degree of pain graded as mild, moderate, and severe
